Bah-ro - Left foot steps back to ready position.

Shi-uh - At ease position.

NOTE: Since the diagonals in the form are twelve 12 “feet” long, stances and jumps must be the proper length to ensure the performer ends the form properly. On the first diagonal, No. 26, the jump inner crescent kick ends in a middle stance with the left foot landing six (6) foot lengths (two (2) middle stances) forward. The jump reverse inner crescent kick gains four (4) foot lengths forward for the left foot when landing in a middle stance for twin elbow strike. So, the first jump gains six (6) feet, the second four (4) feet—and the final middle stance on landing results in 12 “feet” forward movement.

In the second “diagonal,” No. 67, the right jump inner crescent kick gains six (6) foot lengths; the spin heel kick has no change in distance; and the jump reverse side kick must gain four (4) foot lengths; the final sparring stance gains the last three (3) foot lengths.
